Definition					
<p>The Name is a human interpretable string identifier for an object. In general the name can be used to filter and group objects in the receiving modeling applications. Otherwise there are no general rules how to use it.</p>					
<p>This document uses the official IFC Model View Definition Format version 1.1.0. of the IAI (www.iai-international.org) The content of this document has to be certified by the IAI before becoming part of an official IFC Model View Definition.</p>
